# Scanshare Capture 4.7

Glocal Value Srl - distributore per l'Italia

# Overview

- Scanshare Capture V4.7
  - 2017 Q1 scheduled maintenance release
  - Over 100 bug fixes, minor features and enhancements
- Platform extension with new functionality
  - First release of extended features
    - Verification and validation client
    - Personal file repository
  - Uses V4 look-and-feel UI
  - ‘First look’ of new mobile capture client

# Focus 2017

- **Scanshare's focus for 2017**

- Leverage document imaging experience to expand portfolio for greater added value
- Create the most affordable, fully integrated document management system specifically to enhance the offering for multifunctional vendors
- Expand the professional capture functions with verification and 'smart zone' document extraction
- Deliver mobility platform enablers for mobile capture, workflow and document management functions

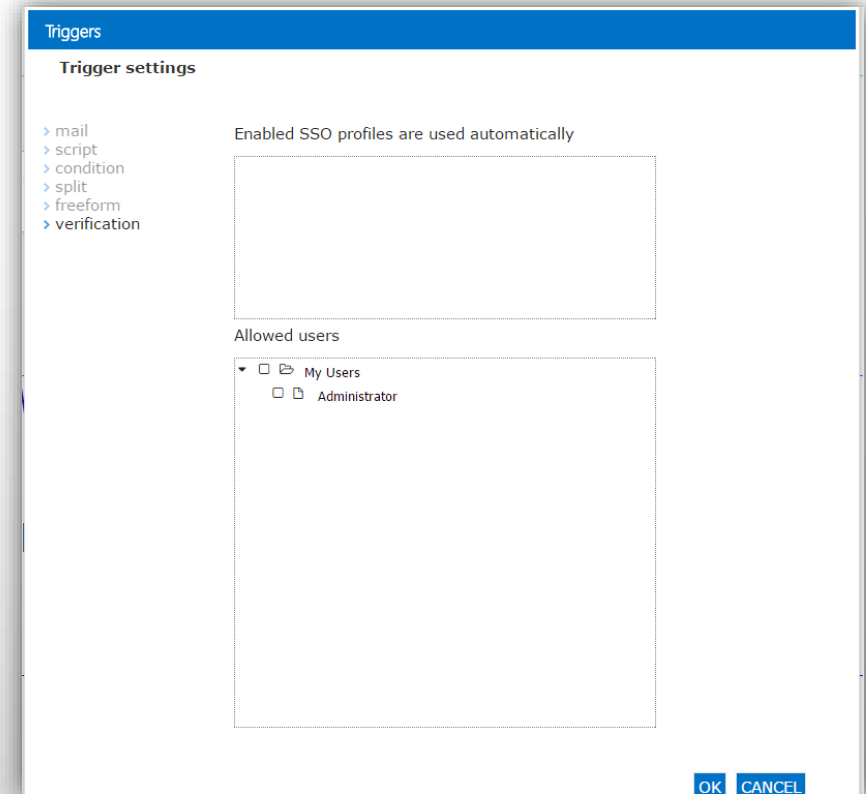

# Maintenance

- Scanshare Capture V4.7
  - Over 100 changes since V4.6
  - Improved performance when reading barcodes
  - Enhanced load balancer durability
  - Numerous connector updates
    - Extra functionality, folder filters, picklist connectors
  - Upgraded barcode output module
  - Improved PDF compression
  - Faster single-sign on performance
  - New session manager
    - Manages concurrent user logins for new features

# Verification station

- Web-based verification station
- Inline workflow module
  - Users can log in and verify metadata
  - Critical for when ZOCR and BCR is used
- Licensed for a number of verifying users (e.g. 3 concurrent)
- User has a chance to correct metadata and continue workflow, or cancel whole job
- Criteria for verification should be on a confidence % (from OCR) or 'Always'

# File Repository

- Corporate users have never had so much choice for storing information

Google Drive

OneDrive

Dropbox

Scanshare

# Personal File Repository

- The problem with conventional ECMs and ERPs
  - Expensive – high cost per user (often named users also)
  - Difficult to use
  - May be departmental only (e.g. finance/ERP)
- Where is the file stored *before* it's uploaded to ECM and ERP?
  - Users' PC desktop; personal cloud storage; USB etc.
  - Unsecured; uncontrolled; little or no backup

ORACLE®

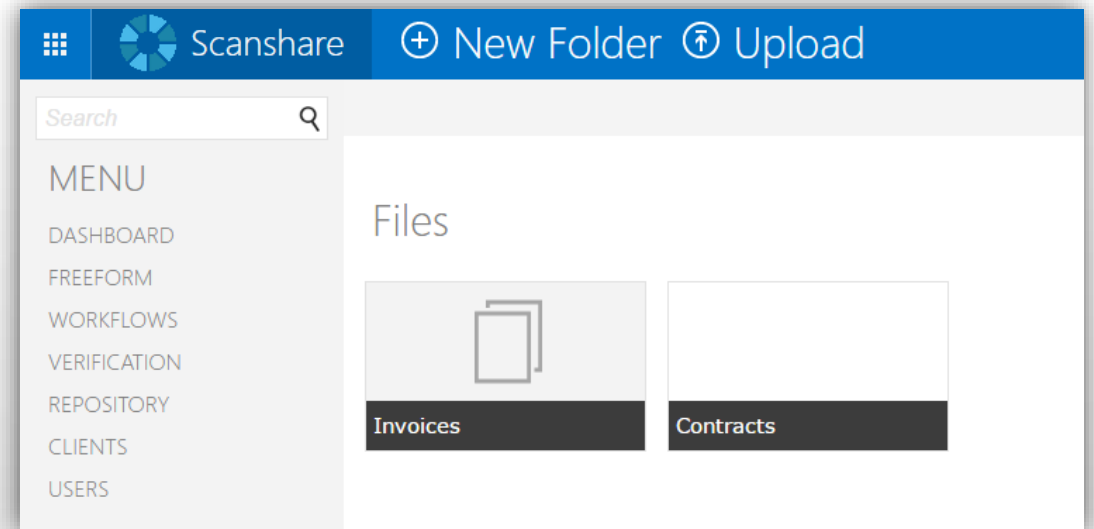

SharePoint

Scanshare

# Personal File Repository

- The all-new Scanshare Personal File Repository

- Designed for users to manage their own working documents
- Concurrent user model
- Low cost – unlimited document storage
- DMS-style features
  - Document version control
  - Controlled document sharing
  - Fully encrypted file store
- High speed document indexing
  - Using the same indexer as the world's leading DMS
- Windows look and feel
  - Using same style sheet as OneDrive
- Mobile friendly

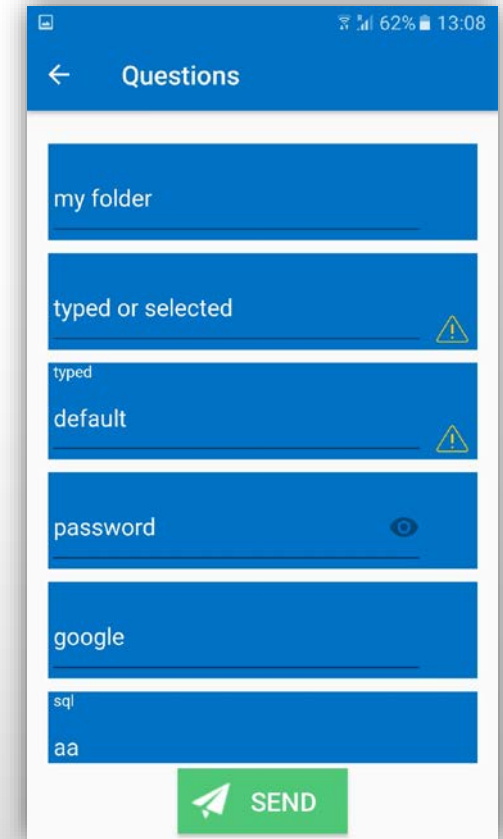

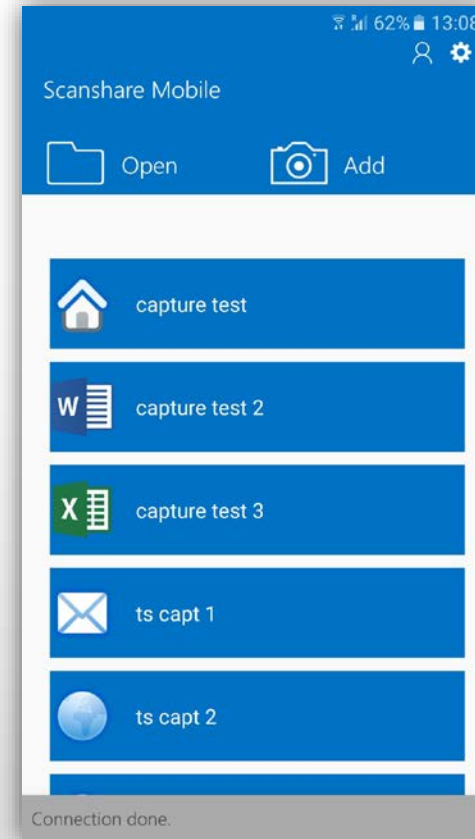

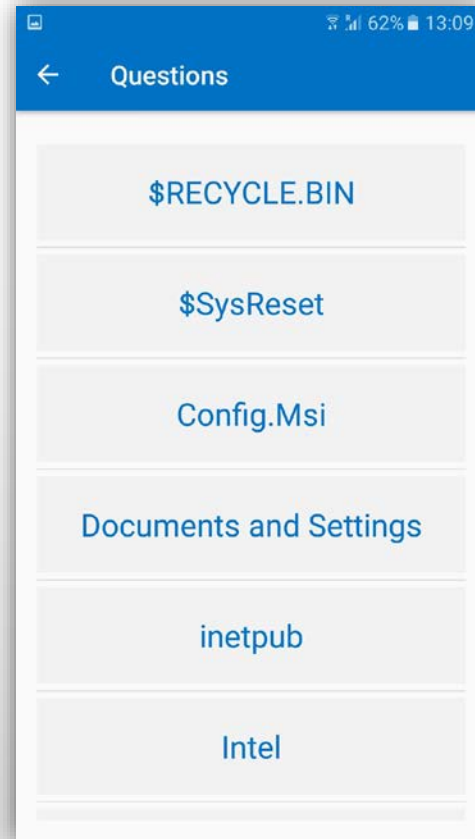

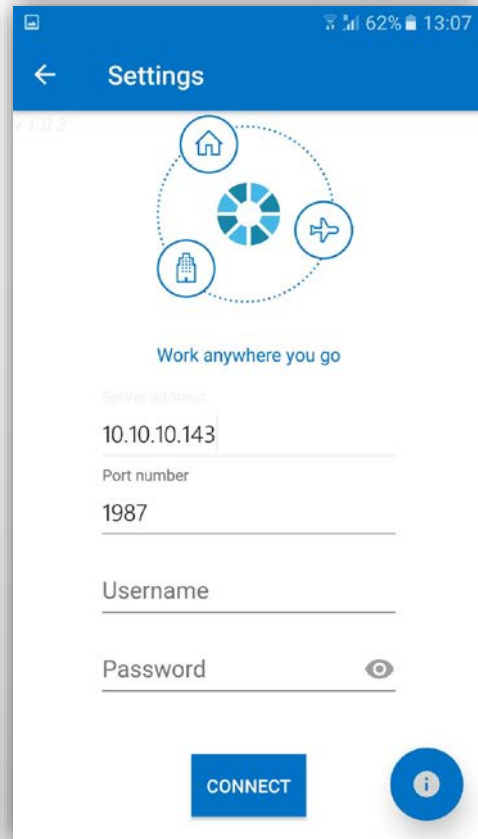

# Mobile Capture

- V5 (Q4 2017) will offer fully-featured mobile capture clients
- Native mobile-based capture applications
- Connect to server-based workflows
- Mobile image acquisition and meta data tagging

# Mobile Capture UX
